    1. Turn Off Start App advertisiment or change add id 6
    2. Change AdMob unit id 6

Objective of the document

The objective of this document is to end user documentation for making his own version of android application

System requirement

- Android studio

Application Function

1. Menu Screen

Menu Screen is the main screen of application. In this screen, user can see

- New Game, Continue
- High Score: Local Board or Google Play LeaderBoard
- More: link to store in Play Store
- Interstitial Ads by Admob, StartApp

FRUIT
LINES
PLAY
RANK
RATE

2. Game View Screen

After choose game play mode (new, continue) , user will be redirected to Game View Screen

User can back to the first screen by using Back Key

3. High Score Screen

In this screen, user can view the score (in local boards or google play service leaderboards)

Make your own version

1. Change your ad network unit id

In project, I already integrate both StartApp and AdMob. I will guide you how to turn off StartApp or change add unit

1. Turn Off Start App Advertisement or change add id

Step 1: Open res → string.xml

Step 2: Change value of this parameter as follow

```
<string name="startapp_dev_id">108863477</string>
<string name="startapp_app_id">205998513</string>
```

2. Change AdMob unit id

Step 1: Open res → string.xml

Step 2: Change value of this parameter as follow

```
<string name="interstitialAd">ca-app-pub-2287645634707543/9569311119</string>
```

3. Change Google play leaderboards

Step 1: Open res → string.xml

Step 2: Change value of this parameter as follow

```
<string name="app_id">724261156110</string>
<string name="leaderboard_fruit_lines">CgkIjurQiooVEAIQCA</string>
```
